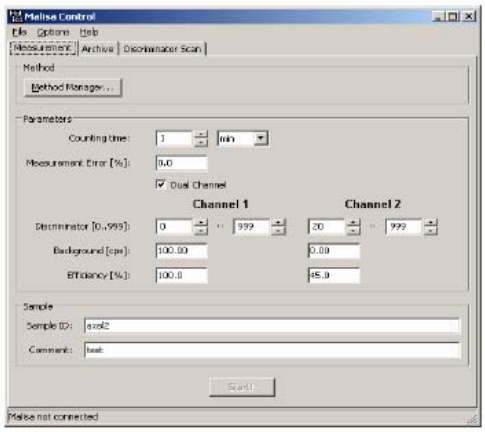
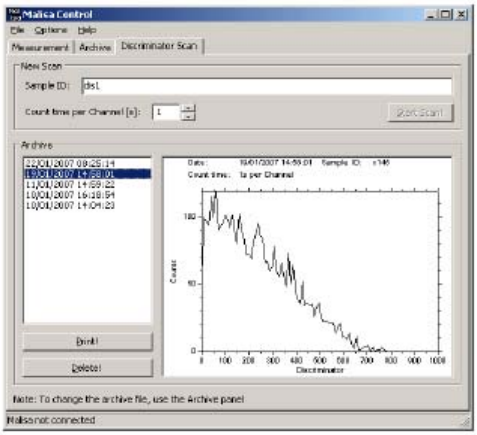
Malisa Star Control Software for Windows

Raytest announces its new Software for the Malisa Star Liquid Scintillation Counter upgrading the system from manually controlled to computer controlled instrument.

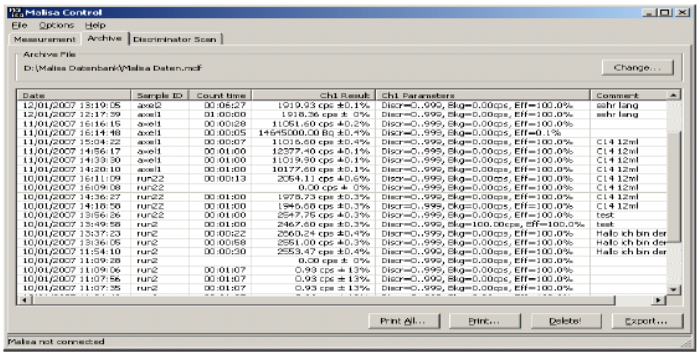
The new Malisa Star Control Software features:



1) remote control of your Malisa Star system via COM-Port of your PC
2) single or dual channel measurements with deadtime correction
3) create and store new methods for your measurements



4) measurement and storing of spectrum scans



5) archive for measurement results and printout to any local or network printer
